

 iPort[®]

FS-21

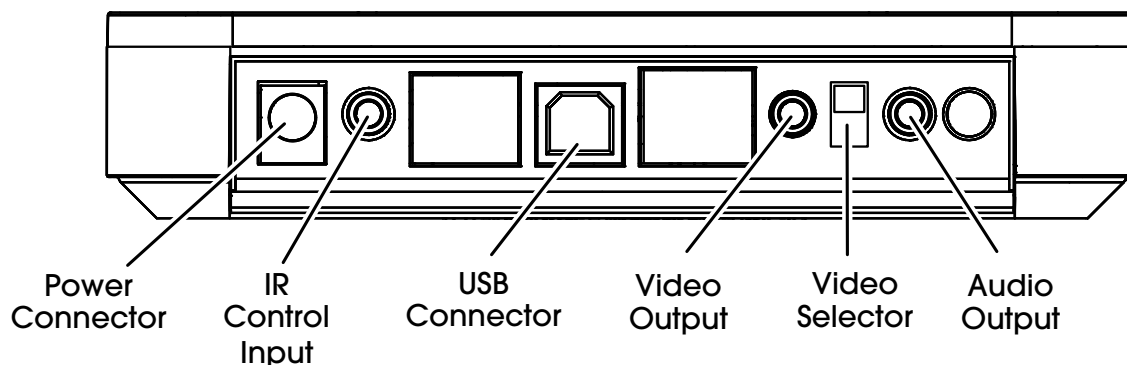

digital media system for iPod
with volume and IR control

The all new, completely redesigned iPort FS Series digital media system for iPod® is the best way to integrate an Apple® iPod and iPhone® into a home audio/video system. The iPort FS provides standard audio and video connections as well as multiple control options for integrating iPod into your home system. Place the iPort FS on any convenient location and connect it to both your A/V system and your computer.

The FS-21 provides standard audio connections, video output via component, composite, or S-video connections for listening and viewing content on the iPod and integrated IR to allow control of the iPod via a remote or through IR input. Volume control is available through IR or via the iPod. Connect the iPort via a USB cable to your computer and transfer content from your computer to the iPod with the push of a button.

Features

- Charges the iPod or iPhone while docked.
- Apple Universal Dock accepts any dockable iPod or iPhone (and corresponding Dock Adapters from Apple).
- Connect to iTunes® with the touch of a button and transfer your content to your iPod.
- Integrated IR allows control of the iPod; locally via remote (sold separately) or through IR input.
- Built-in pre-amp for variable volume control.
- Audio out via included RCA cable.
- Video out via included component video cable. (Composite and S-video cable sold separately.)
- Volume control from the iPod.

FS-21 Includes

- iPort
- Black color insert, with black iPod adapter
- RCA audio cable
- Component video cable
